

Remorse and Tragedy—How a Woman Wronged a Man.

The following romantic and tragic story is from the New Orleans Times.

Nearly a year ago one of the first merchants in the city met and loved a woman of English birth, whom he believed to be a widow.

His advances were favorably received, and many happy hours passed in pleasant converse. The gentleman at length declared his passion. To his surprise, and to the joy of the lady, with many tears, informed him that her husband was not dead. A long story of unkindness, neglect, maltreatment, and a separate maintenance was related. The fair one, with the utmost frankness, went into all the details of her wretched existence, and ended by hoping a divorce suit then pending would terminate in her favor. The gentleman encouraged by the confidence and eager for the possession of such a treasure, insisted on her at once departing for England, and joyfully supplied the lubricating material for the rusty machinery of the courts. The journey was made, and in the course of a few weeks the baggage of \$12,000 was expended.

Not many months elapsed and the lover was favored with a most tender epistle, conveying, in the postscript, intelligence of another draft for \$10,000, which he would of course pay on presentation. The business of the law proved exceedingly expensive. Two more drafts for \$10,000 each were forwarded to this country and promptly paid. The gentleman becoming alarmed at the enormous drain on his purse, ventured to remonstrate, and begged the lady, if possible, to conduct the business with more economy.

The communication in reply, dated at Paris, quickly informed him that the suit had been decided against her, and that she was forever to the object of detestation, and that although she could never forget the distinguished friendship of the kindest of men, they must never again meet on earth.

The unhappy gentleman, maddened at his folly, and crippled in business by the immense outlay of money, ended his existence by his own hand. Long after this tragedy the real creator of it presumes again to address the man she so wronged.

Influence of Marriage on Morals.

Voltaire said: "The more married men you have, the fewer crimes there will be. Marriage renders a man more virtuous and more wise. An unmarried man is but half of a perfect being, and it requires the other half to make things right; and it can not be expected that in this imperfect state he can keep the straight path of rectitude any more than a boat with one oar, or a bird with one wing, can keep a straight course." In more cases out of ten, where married men become drunkards, or where they commit crimes against the peace of the community, the foundation of these acts was laid while in a single state, or where the wife is an unsuitable match. Marriage changes the current of a man's feelings, and gives him a center of his thoughts, his affections, and his acts. Here is a home for the entire man, and the counsel, the example, and the interest of his "better half" keep him from erratic courses, and from falling into a thousand temptations to which he would be exposed. Therefore the friend of marriage is the friend to society and to his country.

The illustrious French speculator was right in his views on this subject, no matter how far wrong he may have been on others. The results to a community, even where the wedded pair may not be well adapted to each other, are advantageous in the main. The notorious immorality of New York city life is due chiefly to the fact that the great mass of its population is unmarried and quartered in boarding-houses and hotels. The married man, once settled in a home of his own, is, to say the least, solicitous for his welfare. His position as *pater familias* induces habits of economy and industry. He is an important member of society, and feels responsible and enjoys privileges and immunities unknown to the bachelor.

Matrimonial Mistakes.—While all men and women, not mentally or physically deficient to the extent of deformity or partial idiocy, may be said to be "born to love and be loved," there are wide differences in the degree and form in which love manifests itself; and in seeking its fruition in marriage, it is of the highest importance that these differences be taken into account and harmonized. Much—everything almost—depends upon adaptation. We often see couples united in marriage where both parties are amiable, and in some degree affectionate, who nevertheless only make each other miserable. Each is capable of loving and making another being happy, but that other does not happen to be the one to which he or she is bound. They are affectionally mis-matched. They do not appreciate or understand each other. Heart does not respond to heart.

A horrible occurrence recently took place near Quincy, Illinois. Mrs. McClure, the wife of a farmer, supposed to have died on Sunday last, was buried on Monday in a vault belonging to the family. On Wednesday, groans were heard from the vault by the children of the buried woman, and an old lady who was with them. Word being sent to the husband and neighbors, they opened the coffin, and found the woman alive. She had torn her hair and bruised herself in vain efforts to escape from her narrow prison. She was taken home, and is now recovering.

Large Eyes.—Large eyes have always been admired, especially in women and may be considered essential to the highest order of beauty, almost every description of which, from Helen of Troy to Lola Montes, they hold a prominent place. We read of "large spiritual eyes," and

eyes loving large, and of "little sparkling, heady eyes," to which the epithets "spiritual" and "loving" are never applied.

An Arab expresses his idea of the beauty of a woman by saying that she has the eye of a gazelle. This is the burden of his song. The timidity, gentleness, and innocent fear in the eye of the "deer" tribe are compared with the modesty of the young girl: "Let her be as the loving hind and the pleasant roe."

Recipes for Sausage Meat.—Eds. Country Gentleman: In your issue of Sept. 27 is a request for a recipe to make sausage meat. The following are all good—the first may be too salt to suit some, but is nice, and keeps well:

No. 1.—To 40 lbs. meat—1 lb. salt, 1 lb. pepper, 2 ovs. sage.

No. 2.—To 20 lbs. meat—powdered sage 10 ounces, powdered summer savory 1 ounce, salt 5 ounces, pepper 2 ounces.

No. 3.—To 30 lbs. meat—8 ounces fine salt, 25 ounces black pepper, 2 teaspoons ground sage, 1 cup sweet majoram or summer savory. CASIA.

Richardson county, Neb.

Maggie Hunter Sold for \$10,000.—Messrs. Douglas & Johnson, of Nashville, have sold the celebrated filly "Maggie Hunter" to the Capt. Thomas Moore, of Kentucky, for the round sum of ten thousand dollars. Maggie Hunter is a two-year-old, and a Lexington filly, out of Laura, of the stock of Col. Woodfolk, of Nashville. This filly has made the fastest time for one mile ever made in America by a two-year-old, averaging one minute and twenty seconds. She is a beautiful and symmetrical animal, and is a credit to Tennessee.—Louisville Democrat.

"Father wants you to send two yards of black broad cloth; he says he will give you a pig, and when he kills his pig last week, he'll pay you what you owe him."

We have heard of energy, and the sudden growth of American towns is a matter of business comment. The following account, given by Gen. McMillan, of the town of Pontotoc, Mississippi, is the most extraordinary exemplification of it. He says:

In one month after I laid off the town, I sold \$30,000 worth of lots. In two months I put up a hotel; good log houses, with brick chimneys, to accommodate 400 persons with board and lodging; stable-room and lots to accommodate 400 horses. In three months after the laying off of the town there were forty-five stores and thirty-three groceries. Property changed hands to the amount of \$300,000 per day for four years.

Tennessee Legislature.—Nashville, Nov. 19.—The bill in the Tennessee House to repeal the present franchise law, and give suffrage to negroes, being a proposition for universal suffrage and amnesty, was laid on the table—39 against 29, the Radicals and Conservatives of East Tennessee voting to lay it on the table, and the Conservatives from Middle and West Tennessee voting against. Another bill was introduced, striking out the word "white" in the present franchise law.

Cooking Egg-plant.—The following directions are given for cooking the fruit of the egg-plant, which may be recommended: Cut longitudinally, like opening a watermelon, scrape out the contents of both halves, mix well with dry bread crumbs, season with pepper and salt, replace in the hollow shell, and bake well in a hot oven. Try it, if you wish a treat. Others direct that the fruit be parboiled before it is opened.

The "Texas Oil, Iron, Mining, and Manufacturing Company" is the name of a new joint stock company that has just been organized in Texas to develop the oil and mineral resources of the State. The capital stock is \$2,000,000. The company starts with excellent prospects of success.

Arrest Of Three Robbers.—We learn that two other persons were arrested and taken to Nashville on Thursday. Their names are Bob H. Colored and John Calvert, a white man. They belong to the gang that recently threw the train from the track of the Louisville and Nashville Railroad, and robbed the passengers. It is said that but one of those engaged in this outrageous transaction is yet at large, and it is quite probable that he will soon be secured.—Nashville Press and Times 17th.

The Nashville Banner, in speaking of the shameful conduct of the Chicago Times, and its proposition to abandon the President, says: "The President has stood by us and we will stand by him, though the torches and turpentine be applied to every dwelling and the surveyor's chain to every acre, in all the broad lands of the South."

Right Rev. F. A. Rutledge, Bishop of Florida, died in Tallahassee, Florida, on the 6th inst. Bishop Rutledge was in the 68th year of his age, the 44th of his constant and untiring efforts in his Master's service, and in the zealous discharge of his sacred duties, as presiding over the Diocese of Florida, even to the last day of his pilgrimage.

The Vote of the Large Cities.—New York city and county, 113,585; Philadelphia city and county, 100,500; Brooklyn and Kings county, 48,919; Cincinnati and Hamilton county, 40,458; Baltimore city and county, 21,600; St. Louis city and county, 21,135; Chicago city and county, 20,945; Boston and Suffolk county, 14,570.

If you are looking at a picture, you try to give it the advantage of a good light. Be as considerate to your fellow-beings as you are to a picture.

To bear evil speaking and illiterate judgment with equanimity, is the highest bravery, it is, in fact, the repose of mental courage.

Mrs. Sick, aged 106, died in Indiana, a few days ago. She has been sick for a long time.

MEDICAL.

THE LATEST AND MOST IMPROVED DISCOVERY OF THE

NINETEENTH CENTURY.

No man's name is more intimately connected with the history of Medicine in the United States or more favorably known as a pioneer in medical discovery, than that of Dr. J. C. BULL. His name is inseparably associated with the discovery of the CEBRON, which is the basis of the BITTERS now offered to the public. That BULL belongs to the ranks of the great medical discoverers of the century is a fact which is becoming more and more generally known. His work, however, is not confined to the discovery of the CEBRON, but extends to the discovery of the BITTERS, which is a most valuable remedy for the treatment of the various diseases of the digestive system. The CEBRON is a most valuable remedy for the treatment of the various diseases of the digestive system. The BITTERS is a most valuable remedy for the treatment of the various diseases of the digestive system. The CEBRON is a most valuable remedy for the treatment of the various diseases of the digestive system. The BITTERS is a most valuable remedy for the treatment of the various diseases of the digestive system.

His work, however, is not confined to the discovery of the CEBRON, but extends to the discovery of the BITTERS, which is a most valuable remedy for the treatment of the various diseases of the digestive system. The CEBRON is a most valuable remedy for the treatment of the various diseases of the digestive system. The BITTERS is a most valuable remedy for the treatment of the various diseases of the digestive system. The CEBRON is a most valuable remedy for the treatment of the various diseases of the digestive system. The BITTERS is a most valuable remedy for the treatment of the various diseases of the digestive system.

His work, however, is not confined to the discovery of the CEBRON, but extends to the discovery of the BITTERS, which is a most valuable remedy for the treatment of the various diseases of the digestive system.
